

Proven Nicks & Matches

*The
Thoroughbred
Group*

www.freemanstallions.co.za

Dear Breeder

Planning matings is not just about proven nicks or breeding theory. We all know that stockmanship plays a vital role – we leave that in your capable hands. Everyone has their own view about what made any champion's pedigree, or why certain lines just don't work – until they actually do! New theories and ideas abound continuously.

Nowadays breeders are blessed with computer programs with access to pedigrees and race records of every horse in the book. As we move from pedigree to pedigree is it possible to remember what worked with what and where? This is a challenge set to all of us.

The stallion syndicates under our management invest substantially each season researching what sire lines have worked best with which broodmare sire lines. We are also blessed with the input of friends who study nicks and crosses as a passion. The process will never be complete. We'd like to share with you what we have learnt from these reports to-date. You might well be able to add more to the list – we hope you will.

This matrix is a work-in-progress but we hope that it will help you make informed decisions on your use of the stallions in our portfolio.

Please visit our website: www.freemanstallions.co.za for more information and please use some of the facilities provided.

Don't hesitate to contact us – we are here to help.

Best wishes for a successful breeding season.

John Freeman & the team.
